EDUCATION

PES Institute of Technology and Management

Bachelor of Engineering in Computer Science and Design

- GPA: 8.5/10.0 | Coursework: DSA, OOP, UX/UI, AI/ML

Shivamogga, Karnataka

Dec. 2022 – July 2026

EXPERIENCE

RankBook Learning and Software Solutions

Full-Stack Developer Intern

On-site

Feb. 2026 – Aug. 2026

- Contributed to MVPs of 4 internal products (LMS Dashboard, CRM, Marketing Website, LMS Mobile App) from database schema design through production deployment, on a shared Supabase PostgreSQL backend.
- Independently built the LMS Admin Dashboard: curriculum editor, online assessment engine, multi-format assignment submission review queue, and a manager analytics dashboard with pipeline velocity, SLA tracking, and revenue forecasting.
- Built features across the internal CRM: real-time Kanban board, Student 360° lead profile, role-based pipeline access controls, and a pipeline status audit trail.
- Built and iterated on a live e-commerce storefront and its headless Vendure backend — product pages with variant pickers and stock indicators, Razorpay checkout, Shiprocket order tracking, and verified-purchase reviews.

PaperPeak

Freelance Full-Stack Developer

Remote

May 2025 – Sept. 2025

- Built a production Next.js platform replacing WhatsApp-based order handling with structured order workflows and real-time tracking.
- Implemented direct-to-S3 file uploads via presigned URLs and integrated Razorpay for payment handling.
- Technologies: Next.js, Firebase, TypeScript, AWS S3, Tailwind CSS, Razorpay API, Shadcn/UI, Vercel
- Production: paperpeak.vercel.app

PROJECTS

Syncova – AI-Driven Project Coordination Platform | Academic Project

May 2025 – Nov. 2025

- Implemented a workload distribution engine using the Hungarian algorithm for mathematically optimal resource allocation, paired with a Greedy strategy for real-time task reassignment.
- Built a multi-tenant task management system using Supabase and PostgreSQL, enforcing strict data isolation through Row Level Security (RLS) policies.
- Wrote recursive SQL queries (CTEs) to detect circular task dependencies and implemented database triggers for real-time progress aggregation.
- Technologies: React, TypeScript, PostgreSQL, Supabase, AWS S3 | syncova.vercel.app

GitDoxx – Real-Time Collaborative Document Platform | Personal Project

Aug. 2025 – Dec. 2025

- Developed a conflict-free collaborative editor by integrating BlockNote with a custom Y.js provider and WebRTC-based synchronization to handle concurrent user sessions.
- Implemented real-time voice typing and document comparison using Groq (Llama 3.1 & Whisper), generating readable Markdown reports for automated version tracking.
- Managed complex application state using TanStack Query for server synchronization and Zustand for local collaboration state.
- Technologies: Next.js 15, TypeScript, BlockNote, Y.js, Firebase, AWS S3 | gitdoxx.vercel.app

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL (Postgres, MySQL)

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend/DB: Node.js, PostgreSQL, MySQL, Firebase, Supabase

Tools/Additional: AWS, Git, Vercel, CI/CD, Figma, RESTful APIs, Responsive Design, PWA, UI/UX Design

Certifications: Programming in Java (NPTEL)

Spoken Languages: English, Kannada, Hindi
